clarifai
The World's AI™

FULL STACK AI PLATFORM

Accelerate all your AI development efforts safely and securely.

Drive rapid time-to-value with a mission-tested AI platform

Clarifai enables government agencies to add artificial intelligence to their software. With computer vision, large language, and audio models in one platform, Clarifai equips your teams with all the tools they need to get AI into production with our secure, privacy-enabled, and scalable hybrid cloud offering.

With powerful out-of-the-box capabilities, supporting multiple use cases for deployment at operational scale is easy, safe, and secure. Platform-, cloud-, and edge-agnostic, our open architecture helps you build AI quickly so you can focus on your mission.

> *Clarifai's demonstrated success working with government and defense agencies on mission-critical CV use cases has hardened the company's platform to extend to a broad range of use case requirements.*

Data Preparation

Scribe Automated Data Labeling

AI-assisted labeling capability will allow you to label your data 100x faster. Or use our labeling experts "LabelForce" to ensure models of the highest quality. Worker productivity metrics, as well as labeling accuracy with fully automated, project-specific evaluations.

Spacetime Search and Data Management

Allows for large scale data management via similarity, keyword or metadata searches, immediately upon ingestion by automatically indexing. Store and search vectors. Patented capabilities to search with custom concepts, without reindexing.

Model Building

Enlight Training and Evaluation

Customizable model training toolkits for any model type and accuracy threshold. Open source, customizable evaluation modules configurable with Streamlit python libraries.

Model Ops

Armada Serverless Inference
Elastic inference engine that scales up and down the compute resources to run your models at production volume cost effectively, without DevOps. Save as much as 70% on inference.

Mesh Workflow Engine
A drag and drop workflow engine. It allows you to tie models and logical operators together to solve complex problems.

Collectors for Continuous Learning
Collect targeted prediction data to feed back into projects, monitor data drift, auto label datasets and continuously create smarter model versions.

Flare Edge AI
Edge-optimized Clarifai installation for inference and edge data collection. Run on low-power devices or on-premise supercomputers.

Build generative AI at production scale

99.99% uptime and reproducible AI with enterprise-grade privacy and security.
AI APPLICATIONS

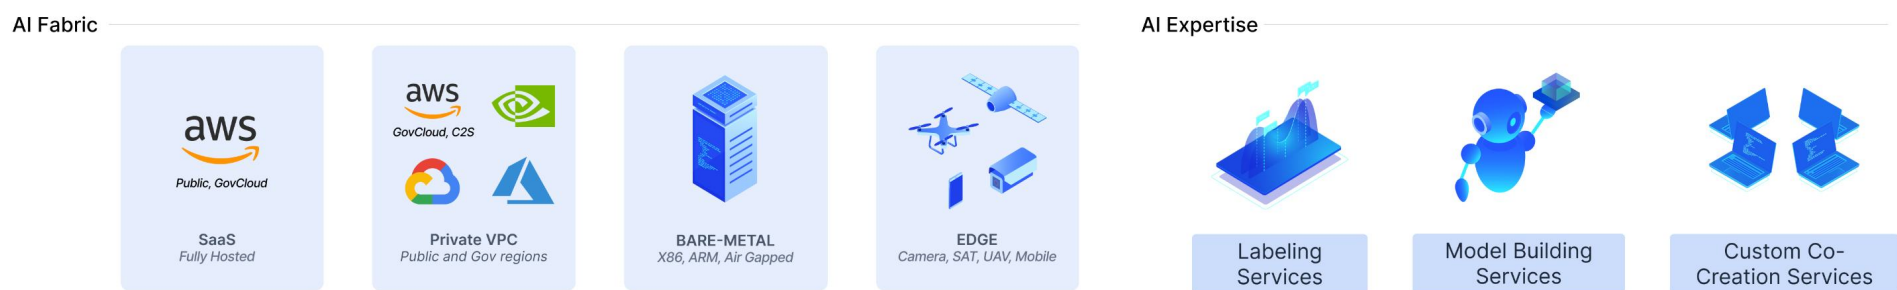

- AI APIs
- AI Portal UI
- AI Agents
- Modules
- Community

AI LIFECYCLE

- Images, Videos, Text & Audio
- Data and Vector Store, Search & Manage
- Automated Data Labeling
- Train, Evaluate, Upload
- Prompts
- Elastic Inference
- Workflows
- Collect Production Data

AI LAKE

- Inputs
- Vectors
- Annotations
- Concepts
- Datasets
- Models
- Prompts
- Workflows

AI Lake: Public & Private Version Management

AI FOUNDATIONS

AI Fabric

- aws — Public, GovCloud — SaaS — Fully Hosted
- aws GovCloud, C2S — Private VPC — Public and Gov regions
- BARE-METAL — X86, ARM, Air Gapped
- EDGE — Camera, SAT, UAV, Mobile

AI Expertise

- Labeling Services
- Model Building Services
- Custom Co-Creation Services

App Partners

Integrations
- zapier
- activepieces
- LlamaIndex
- LangChain
- Streamlit

Tech
- databricks
- CISCO
- UiPath
- snowflake
- Hewlett Packard Enterprise
- leidos
- ECS
- NVIDIA

Toolkits

- OpenMMLab
- ONNX
- PyTorch
- TensorFlow
- NVIDIA TRITON INFERENCE SERVER

Open source models and FMs

- Anthropic AI
- OpenAI
- salesforce
- cohere
- Google
- AI21 labs
- Meta AI
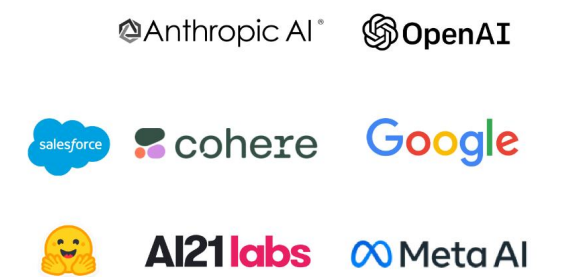

Facility Clearance & Security Posture

- DCSA
- SOC 2 TYPE 2
- CMMC LEVEL 3
- NIST 800-171 — NIST 800-171
- NIST 800-53 — NIST 800-53
- HIPAA COMPLIANT — HIPAA

AI Lake™ for Real Time Collaboration

Users and teams collaborate together in a single place using the AI Lake™.

As organizations increase their adoption of AI, many are finding they need a single place to house all of their AI resources, make those accessible to teams and control access. In doing this, organizations maximize the oversight of their AI efforts, and make their efforts auditable, measurable, and reproducible.

Clarifai pioneered the AI Lake™, which lets you organize all your AI models, datasets, workflows, and UIs in one place and collaborate across teams building AI, delivering fast time-to-value from all AI initiatives, while reducing the amount of resources needed.

Organizations that partner with Clarifai can be confident that they are building a "future-forward" AI strategy that ensures that previously siloed AI projects become visible across teams, can collaborate in real time, and leverage investments in all AI initiatives simply and cost-effectively.

Contact us to speak to an AI expert.

We can help you successfully advance your AI projects.
